		(including cover)	

Sheri,

Enclosed is a draft letter for your signature that documents our agreement that the new building for the Perimeter Groundwater Containment System can be constructed without a formal submittal to U.S. EPA. If the letter is acceptable, I will finalize it and get it to you for your signature. After you have had a chance to review it, please give me a call at 303-938-8818.

Thanks for your help.

Joe

Project No.: 4077.0100

SUBJECT: Construction of a Building for the Groundwater
Treatment System Building
American Chemical Service, Inc. Superfund Site
Griffith, Indiana

Dear Ms. Bianchin:

*On behalf of
Don Johnson*

As we discussed in one of our recent meetings, Montgomery Watson is planning to begin construction of a prefabricated metal building to house the groundwater treatment system that will be installed at the American Chemical Service, Inc. (ACS) Site. The original plan was to locate the equipment within one of the existing ACS buildings, but there is not sufficient room to accommodate the proposed facilities. Consequently, a new building will need to be constructed at the site. As we discussed, the new building will be located directly west of ACS operation outside of the existing ACS fence. An access road between the building and Colfax Road will be constructed just north of the existing ACS fence. Construction of the access road will begin within the next few weeks with construction of the building beginning after the road is in place. Our goal is to have the building constructed this year so that installation of treatment can continue through the winter.

The purpose of this letter is to confirm our understanding that that no formal submittal is required for construction of the treatment bldg;
if we are correct in our understanding,

Ms. Bianchin/U.S. EPA

understanding, please sign and return one copy of this letter for our files. Thank you for your attention to this matter. If you have any questions or concerns, please don't hesitate to contact me at (303) 938-8818.

Sincerely,

MONTGOMERY WATSON

Joseph D. Adams Jr., P.E.
Vice President

I concur with your understanding as stated above.

Sheri Bianchin/U.S. EPA
